PROFESSIONAL EXPERIENCE

Infosys Ltd, AI / Data Engineer — Bengaluru, India | 07/2025 – Present

Enterprise IAM Data Migration & Compliance Analytics

- Developed and supported enterprise data pipelines integrating identity and access management data from 8+ platforms using **AWS S3**, **Databricks, PySpark, Airflow**, and AutoSys.
- Supported daily processing of 50+ files and 500+ GB of enterprise data, enabling analysis of 100,000+ IAM accounts.
- Automated 5+ recurring workflows through Airflow DAGs and AutoSys scheduling, supporting reliable data ingestion and transformation.
- Implemented data transformation and compliance logic supporting 6+ IAM compliance reports and metrics.
- Worked with bronze, silver, and gold data layers and **Unity Catalog** to organize and manage enterprise datasets.

SharePoint Data Automation — Microsoft Graph API

- Developed an automated integration workflow using **Microsoft Graph API** to retrieve SharePoint data and distribute processed information to designated users through email.
- Configured application authentication and API connectivity using Microsoft Entra ID credentials to support automated data retrieval and delivery.

Infosys Ltd, Big Data Intern — Mysore, India | 02/2025 – 06/2025

- Developed a social media analytics prototype using Python, PySpark, Kafka, and MongoDB to analyze engagement and sentiment.
- Implemented sentiment analysis and engagement scoring to derive insights from sample social media datasets.

PROJECTS

Enterprise RAG-Based Knowledge Chatbot

- Developed a Retrieval-Augmented Generation (RAG) chatbot to answer enterprise-related queries using relevant information retrieved from a knowledge base.
- Integrated document retrieval with LLM-based response generation to provide context-aware answers grounded in retrieved content.
- Explored modern AI application techniques using RAG, embeddings, vector databases, and LangChain/LangGraph to build knowledge-grounded conversational systems.

LLM-Based Text and Dialogue Summarizer

- Fine-tuned an LLM-based summarization model to convert lengthy conversations and task-related text into concise, meaningful summaries.
- Applied NLP and text summarization techniques to extract key information and improve the accessibility of lengthy textual content.
- Focused on generating clear, actionable summaries that help users quickly understand important discussion points and task details.

EDUCATION

Yeshwantrao Chavan College of Engineering, Nagpur — 07/2021 – 06/2025
B. Tech. (Information Technology)

SKILLS

Programming: C, Python, SQL, Java, PySpark
Data Engineering: Apache Spark, Databricks, Apache Airflow, Apache Kafka, AutoSys, ETL/ELT, Data Warehousing
Cloud & Storage: AWS S3, AWS, Delta Lake
Databases & Vector Databases : MySQL, MongoDB, PostgreSQL, ChromaDB, FAISS, PineCone
AI/ML: Machine Learning, Generative AI, LLMs, RAG, LangChain, LangGraph, Agentic AI, MCP.
Tools & Integration: Microsoft Graph API, SharePoint, Git, Linux, Shell Scripting, Docker, Kubernetes

CERTIFICATES & ACHIEVEMENTS

- Databricks Certified Data Engineer Associate
- Solved 500+ problems on LeetCode.
